PROJECTS

RepoFitness

11/2022 - Present

Responsive website using HTML, CSS, JavaScript. Utilized React.js components for the front-end of the application creating an application that organizes client feedback with the use of a voting system. Made RESTful API fetch calls to an Express, MongoDB, Node.js backend handling all create, read, update, delete (CRUD) operations, and tested all backend routes during development using Postman. Used Mongoose to define schemas for MongoDB collections. Implemented ES6 tagged template literals with Styled-Components along CSS3 to provide style and flexbox layout of the application.

Reddit Clone

Django Framework Python API. Created a Reddit clone that lets users comment and vote on what they like or dislike. Used React.js to serve the front-end with Javascript methods and functions. Served the back-end of the application using Django Flask and Python methods and functions utilizing MySQL database management. Styled and created the visual aspects using Materialize, HTML5, and CSS3.

SKILLS

CSS, Django, Expressjs, HTML, JavaScript, MongoDB, Mongoose, Node.js, PostgreSQL, Python, React, RESTful Routing, Sequelize
